Course: NLP

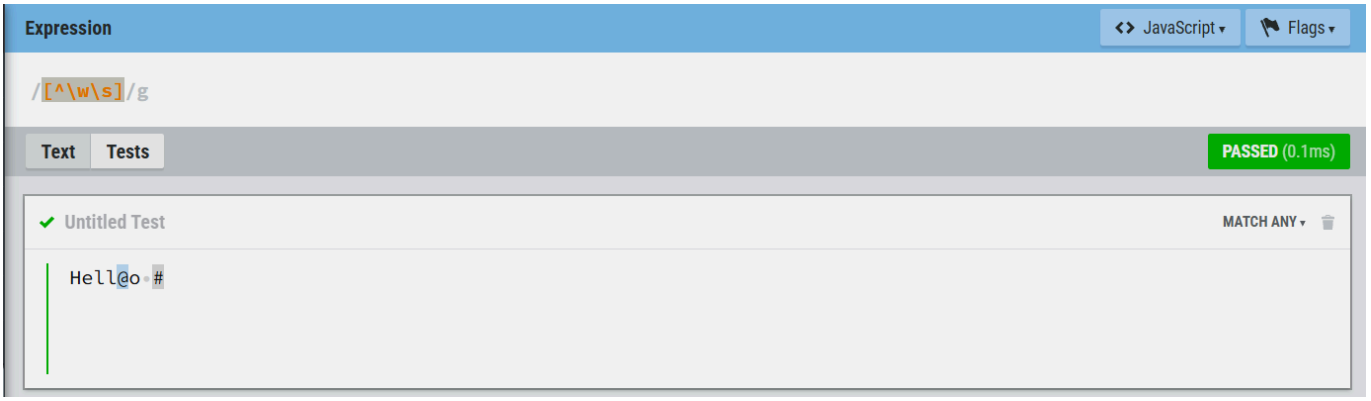

Lecturer: DR. VALY Dona

RE Exercises

Write a regular expression to match each of the following patterns:

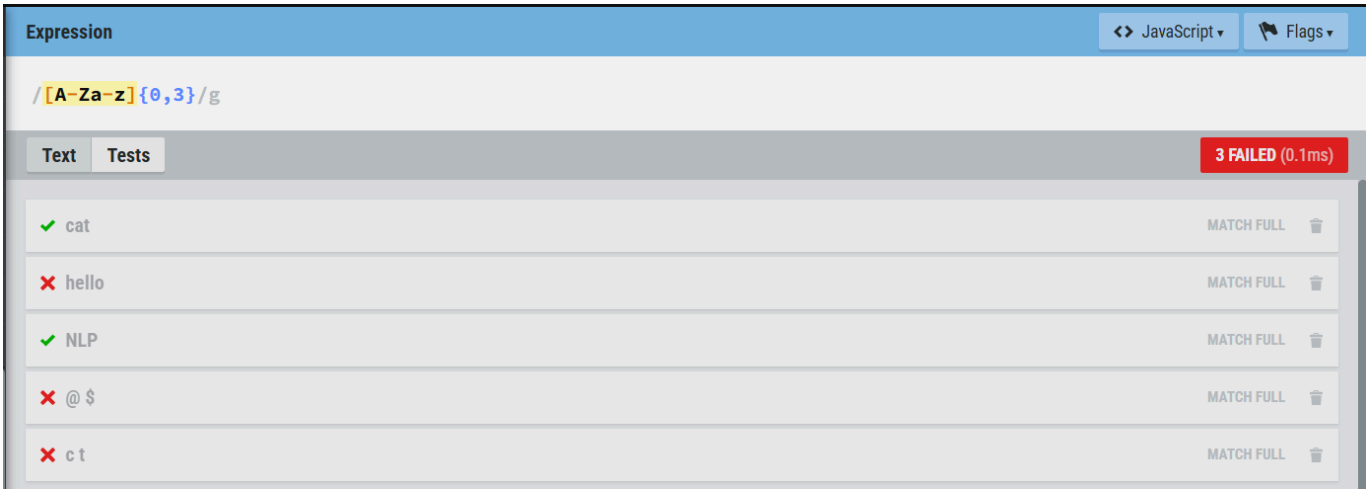

1. Any character that is not a word character nor a white space

```
[^\w\s]
```

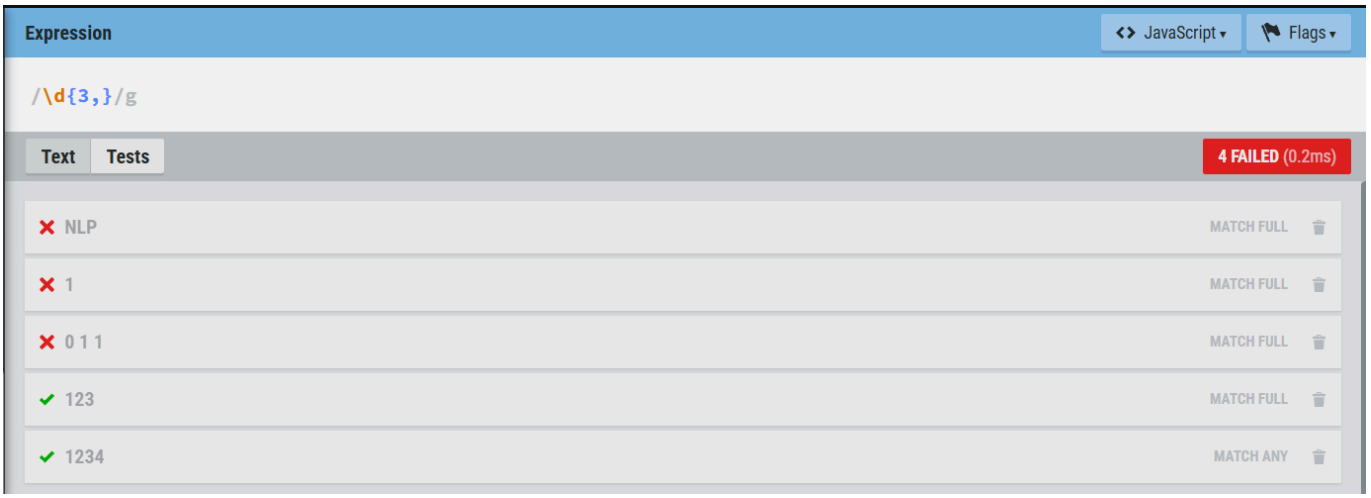

2. String of letters whose length is at most 3

```
[A-Za-z]{0,3}
```

3. String of digits whose length is at least 3

```
\d{3,}
```

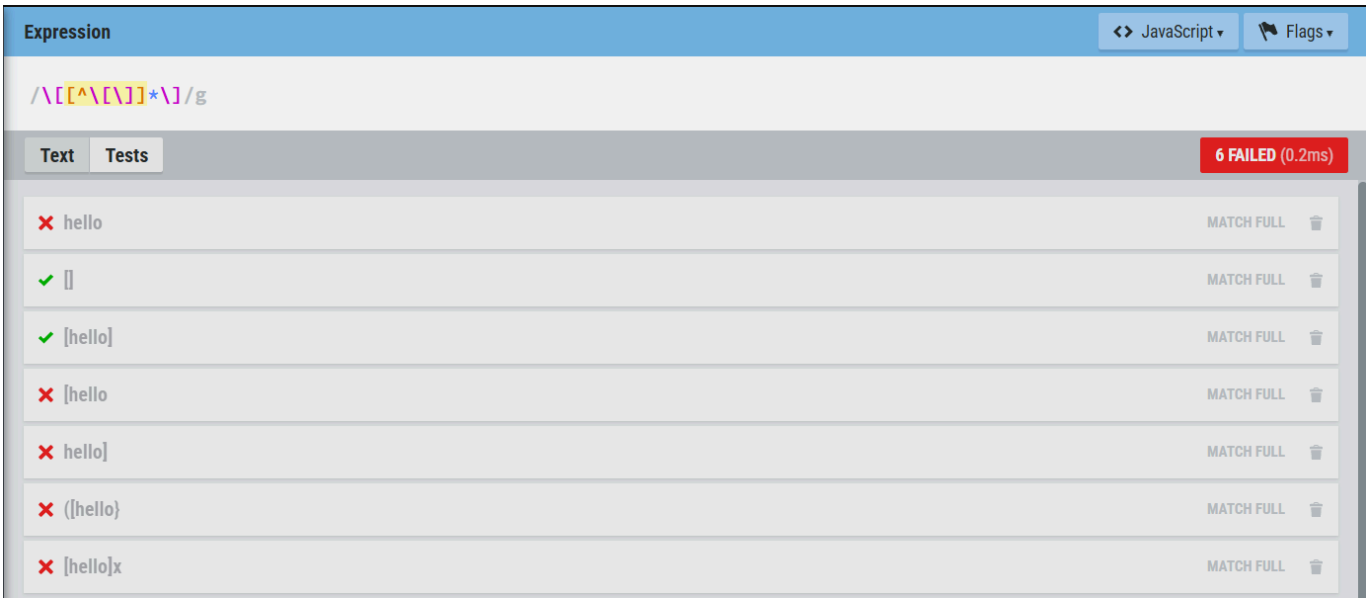

4. String of word characters containing at least one a and one b

```
(?=\w*a)(?=\w*b)\w+
```

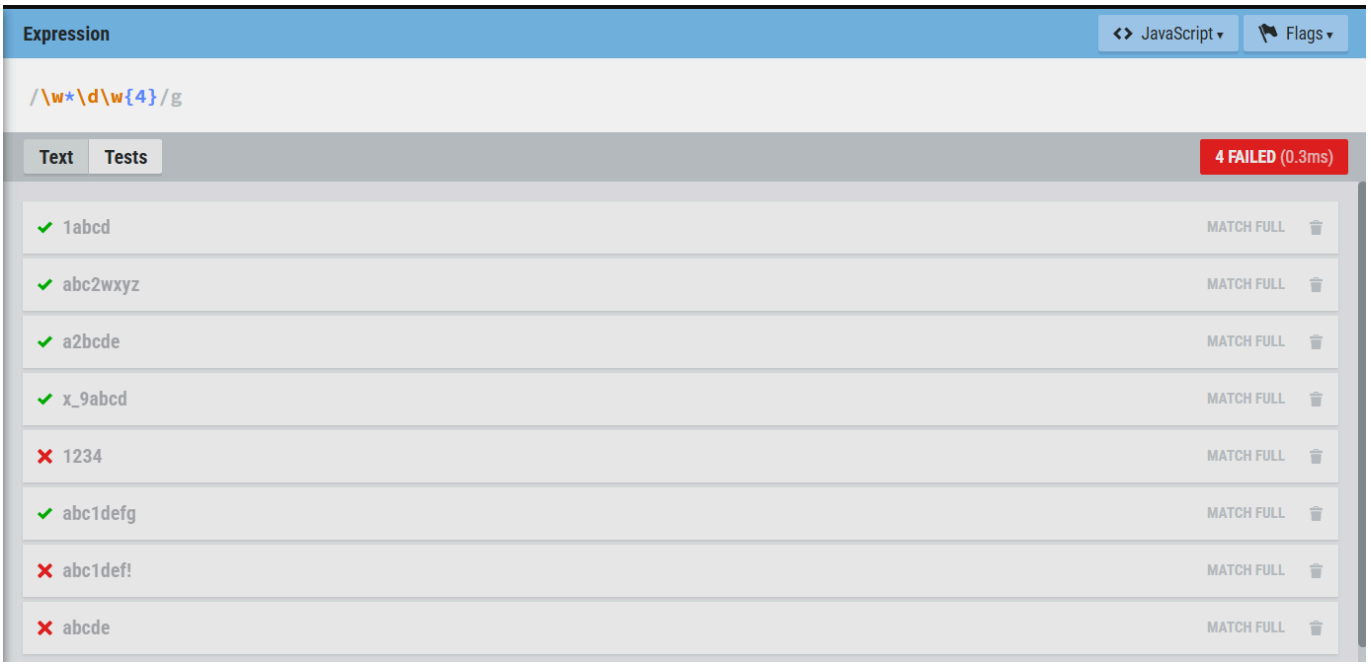

5. Anything enclosed by square brackets

```
\[[^\[\]]*\]
```

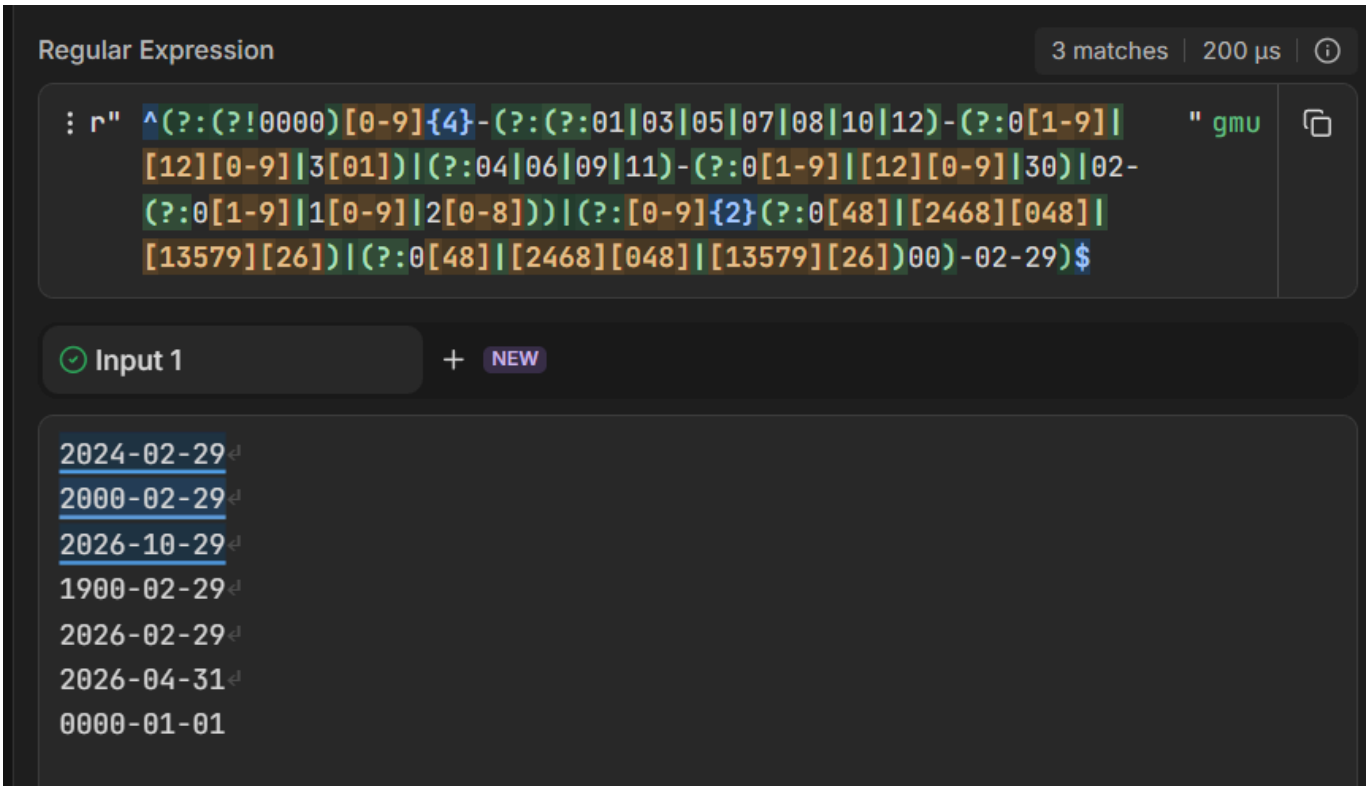

6. String of word characters whose the 5thcharacter from the right end is a digit

```
\w*\d\w{4}
```

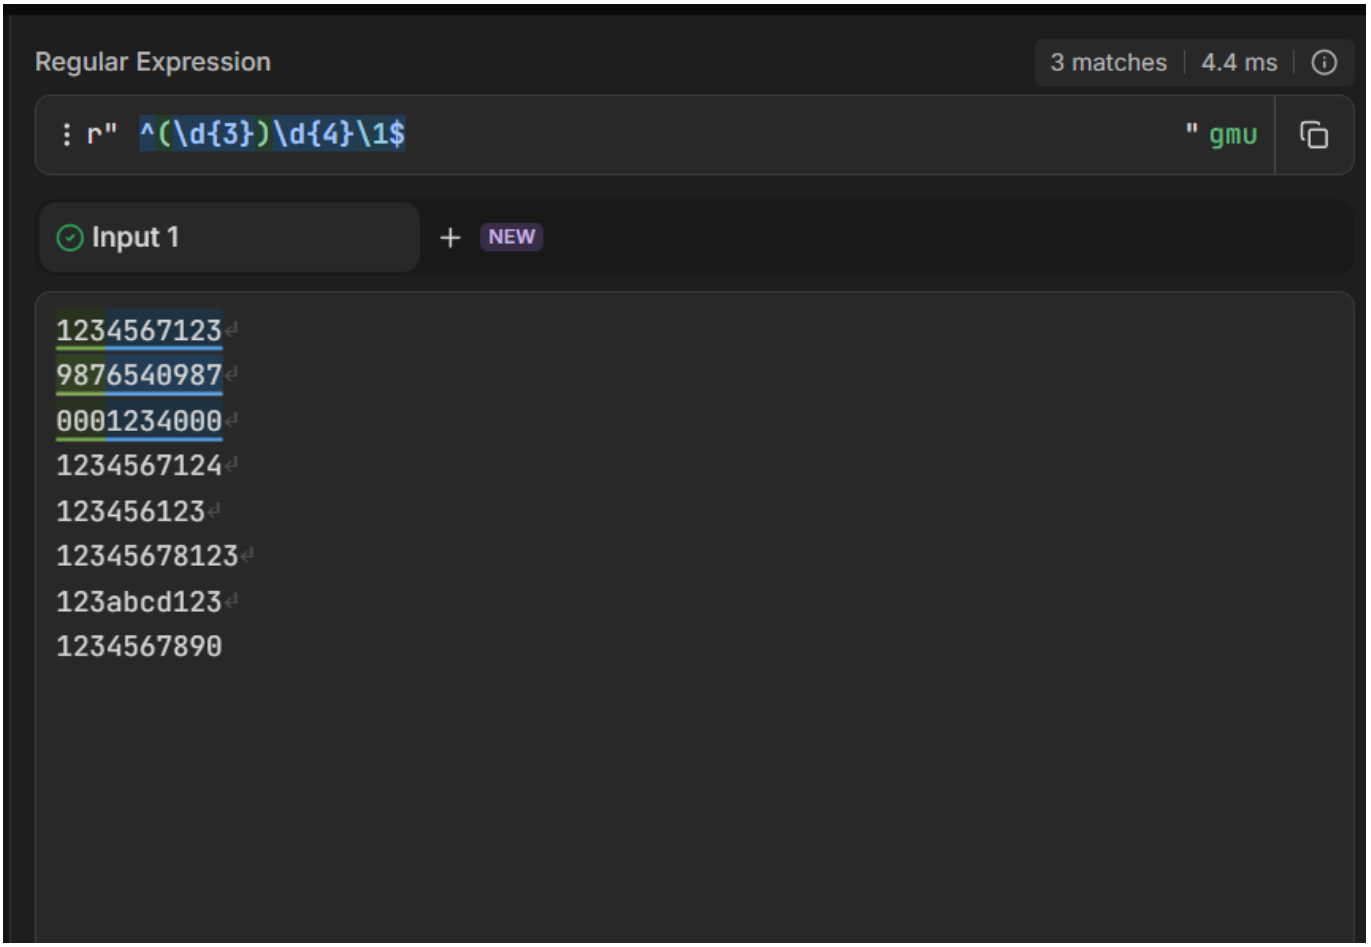

7. Date format: yyyy-mm-dd

```
^(?:(?!0000)[0-9]{4}-(?:(?:01|03|05|07|08|10|12)-(?:0[1-9]|[12][0-9]|3[01])|
(?:04|06|09|11)-(?:0[1-9]|[12][0-9]|30)|02-(?:0[1-9]|1[0-9]|2[0-8]))|(?:[0-9]{2}
(?:0[48]|[2468][048]|[13579][26])|(?:0[48]|[2468][048]|[13579][26])00)-02-29)$
```

8. String of 10 digits that starts and ends with the same 3 digit sequence

```
^(\d{3})\d{4}\1$
```

9. Password satisfying the following conditions:

- at least 1 lowercase letter
- at least 1 uppercase letter
- at least 1 digit
- six characters or more

```
^(?=.*[a-z])(?=.*[A-Z])(?=.*\d).{6,}$
```
